## 1. NSDL.org Sites

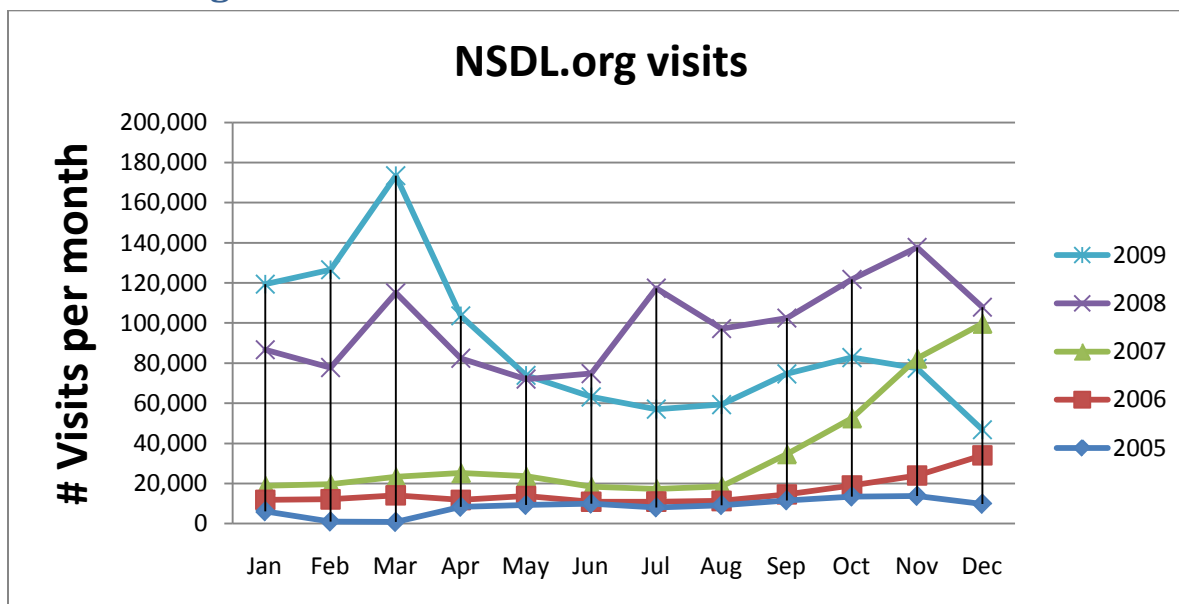

Figure 1. NSDL.org visits

NSDL.org sites instrumented with Omniture, including nsdl.org, ExpertVoices, NSDL Wiki and the Science Literacy Maps, had 1,058,121 visits in 2009. This was down from the 2008 but up from previous years.

Year	Yearly Visits
2009	1,058,121
2008	1,193,327
2007	434,539
2006	188,568
2005	101,183

Table 1. NSDL.org sites visits

In early October 2009, NSDL.org and the Science Literacy Maps were instrumented with Google Analytics to enable a better understanding of how resources are accessed. In addition to whole site usage and resource tracking, separate profiles and custom reports were set up for the Landing Pages and the Search UI to provide a glimpse into how users are interacting with these special sections of the site. The data in the tables below are for the last quarter of 2009 and are excluding resource clicks.

#### NSDL.org Overall

Visits	96,876
Pageviews	218,099
Pages/Visit	2.25
Bounce Rate	68.52%
Avg Time on Site	1:49
New Visits	83.48%

Table 2. NSDL.org overall data

#### NSDL.org without Search Results or Landing Pages

Pageviews	87,953
Pages/Visit	2.06
Bounce Rate	66.34%
Avg Time on Site	2:02
New Visits	76.34%

Table 3. NSDL.org data excluding search and landing pages

#### NSDL.org Landing Pages Only

Pageviews	57,994
Pages/Visit	1.14
Bounce Rate	86.09%
Avg Time on Site	0:36
New Visits	91.32%

Table 4. NSDL.org landing page data

#### NSDL.org Search UI Only

Pageviews	76,771
Pages/Visit	3.56
Bounce Rate	28.24%
Avg Time on Site	4:32
New Visits	75.92%

Table 5. NSDL.org search UI data

During the last quarter of 2009, the NSDL Landing Pages resources were viewed approximately 2,581 times and the NSDL Search UI resources were viewed approximately 33,183 times. A resource view for a landing page is counted if the user clicks on the resource title link or the link to view the resource in its own window. A resource view for the search UI is counted whenever a resource title is clicked. Users spend an average of 36 seconds on the landing pages while the average time spent at the Search UI is 4 minutes and 32 seconds.

### Collections Deaccessioning

The NSDL landing pages were created in 2007 in order to expose NSDL resources to search engines such as Google. In early 2009, NSDL modified its landing pages to return a 404 page not found for items that were not in the library. Additionally, NSDL deaccessioned 2 million resources between July and November 2009 that were no longer a part of the library's scope, primarily journals and resources with poor metadata quality. These activities resulted in an expected and natural drop in page visits.

The collection deaccessioning effort resulted in a significant drop in results returned for a search query, a doubling of pathways resources appearing in the first page of search results and a large drop in the number of inaccessible or broken resources. Since more pathways resources are being exposed, NSDL chose to retire the Pathways sidebar on search results page. The cleaner collection caused the sidebar to frequently duplicate what was in the regular search results so removing it made the UI less cluttered.

Other boons of the deaccessioning effort were that quality educational resources in the first page of results doubled, and interactive resources quadrupled. Additionally, the number of resources catered to K-12 audiences tripled.

However, the deaccessioning effort exposed more duplicate resources appearing in the first search results page due to slight variations in how collections cataloged some URLs, indicating that some additional resource cleanup may be needed by collection providers.

The testing methodology and results of deaccessioning can be viewed in the 2009 Annual Meeting presentation [Contributing Collections to NSDL: A How To](#).

According to Omniture, most of top exit links during first quarter of 2009 were journals. During the last quarter of 2009, most if not all of the top 10 exit links were educational resources and Pathways links. The educational resources that were accessed prior to the deaccessioning experienced increased access after deaccessioning which may indicate that users are finding those resources easier.

According to Google Analytics, the top collections accessed from search during the last quarter of 2009 were:

1. Internet Scout Project
2. AMSER
3. BEN
4. DLESE
5. MSP2
6. ComPADRE
7. Math Forum
8. NEEDS
9. Teach Engineering
10. eERL

Tracking exit clicks directly from search results was implemented in early October 2009 in Google Analytics and is not available prior to that date.

## **NSDL K-12 Pages**

The NSDL.org K-12 pages were refactored in August 2009 to utilize frequently updated feeds from external content sources such as the ExpertVoices blogs . The new pages feature separate tabs for Elementary School, Middle School, High School and Professional Development. In addition to providing more frequently updated content, the new page structure may provide insight into what audiences are using this section of the site.

Less people went to the K-12 main page in the third quarter 2009 than the first quarter 2009. This follows a similar trend from 2008, although the difference is slightly less in 2009 than it was in 2008.

<b>K-12 Main Page Visits</b>	<b>2009</b>	<b>2008</b>
<b>First Quarter</b>	4,471	5,240
<b>Second Quarter</b>	3,061	2,861
<b>Third Quarter</b>	3,385	3,367
<b>Fourth Quarter</b>	3,156	3,321

Table 6. Visits to NSDL K-12 Pages

Of the new K-12 pages, the most frequently accessed after reaching the K-12 main page is elementary school, followed by high school, middle school, and professional development. Slightly more people are visiting the elementary page than middle school or high school page. Middle school and high school page visits are roughly even.

<b>Elementary</b>	
<b>Month</b>	<b>Visits</b>
Sep 2009	111
Oct 2009	136
Nov 2009	135
Dec 2009	90
<b>Totals</b>	<b>472</b>

Table 7. Elementary page visits

<b>Middle School</b>	
<b>Month</b>	<b>Visits</b>
Sep 2009	77
Oct 2009	88
Nov 2009	73
Dec 2009	65
<b>Totals</b>	<b>303</b>

Table 8. Middle School page visits

<b>High School</b>	
<b>Month</b>	<b>Visits</b>
Sep 2009	62
Oct 2009	83
Nov 2009	102
Dec 2009	58
<b>Totals</b>	<b>305</b>

Table 9. High School page visits

The Professional development page was accessed more prior to the redesign than afterwards. Moreover, the page was generally experiencing an increase in traffic from similar timeframes in previous years. This could be indicative that the new Professional Development tab is not easily seen by users.

<b>K-12 PD Page Visits</b>	<b>2009</b>	<b>2008</b>	<b>2007</b>
<b>First Quarter</b>	573	438	0
<b>Second Quarter</b>	428	321	136
<b>Third Quarter</b>	345	1,113	219
<b>Fourth Quarter</b>	173	763	297

Table 10. K-12 professional development page visits

Exiting the page is not necessarily a negative action as there are primarily exit links on the K-12 pages, but, according to page flow analysis, people immediately exiting the site after reaching the K-12 main page rose approximately 6%. This could either indicate that users are seeing and using the exit links more readily or that they are not finding what they are looking for and leaving the site. In addition to the Pathways links, external links could be in the sidebar twitter feed, the Strandmaps resources, or the blog feed.

The Pathways links were previously on a separate page and during the first quarter of 2009, 6.41% of users went to those pages after accessing the K-12 page. From the Pathways page, users had to go to a detail page before being presented with a link to the Pathway. NSDL.org is currently not instrumented to capture exit link data as part of a page flow analysis, so it is not clear if users are clicking on the links or if they are closing the browser.

## ExpertVoices Blogs and NSDL Wiki

According to Google Analytics, the most accessed blogs in 2009 were [Cornell Info 2040 - Networks](#) followed by [Exemplary Resources for Middle School Math and Science](#). The most accessed wikis were [MiddleSchoolPortal/Reading Comprehension Strategies](#) and [MiddleSchoolPortal/Reading and Writing Mathematics](#).

Expert Voices	
Visits	80,162
Pageviews	129,202
Pages/Visit	1.61
Bounce Rate	74.18%
Avg Time on Site	1:05
New Visits	88.53%

Table 11. Last quarter 2009 Expert Voices data

NSDL Wiki	
Visits	20,968
Pageviews	44,898
Pages/Visit	2.14
Bounce Rate	68.73%
Avg Time on Site	2:11
New Visits	81.51%

Table 12. Last quarter 2009 Wiki data

## NSDL Science Literacy Maps

The NSDL Science Literacy Maps were instrumented with Google Analytics in October 2009. According to Google Analytics data, during the last quarter of 2009, the Science Literacy Maps had 5,092 visits with 3,715 absolutely unique visitors. Most people are referred to the Science Literacy Maps from NSDL.org, followed by direct traffic and Google. From the Science Literacy Maps homepage, approximately 27.91% of visitors exit the site while 62.09% of visitors view a chapter listing.

Strandmaps	
Visits	5,092
Pageviews	29,139
Pages/Visit	5.72
Bounce Rate	33.70%
Avg Time on Site	4:57
New Visits	71.03%

Table 13. Last quarter 2009 Strandmaps data

During the last quarter of 2009, Science Literacy Maps resources were viewed approximately 1,542 times.

The top collections accessed from the map information bubble in the Science Literacy Maps are:

1. ComPADRE
2. DLESE
3. MSP2
4. BEN
5. Harvard Smithsonian digital video library
6. AMSER
7. Internet Scout Project
8. Choosing and Using DLESE

9. American Museum of Natural History
10. Michigan Online Resources for Educators (MORE)

The most visited chapter overall was The Physical Setting (127 visits, 1,418 pageviews) while The Nature of Science chapter had the most pageviews (71 visits, 1,728 pageviews). The most viewed map is Evidence and Reasoning in Inquiry (24 visits, 357 pageviews) from The Nature of Science chapter. The most visited maps are The Laws of Motion (28 visits, 157 pageviews) from The Physical Setting chapter, Cell Functions (27 visits, 182 pageviews) from The Living Environment chapter, and Evidence and Reasoning in Inquiry from The Nature of Science chapter. Evidence and Reasoning in Inquiry is the first map listed in The Nature of Science chapter, which is the first option listed in the chapter list and may be factor in its high rank.

The top searches performed on the Science Literacy Maps site are:

1. Astronomy - 11
2. Energy - 10
3. Weather - 9
4. Biology - 8
5. Cells - 8
6. Chemistry - 8
7. Water - 7
8. Water cycle - 7
9. 1496 - 6
10. Physics - 6

## Time Spent at NSDL.org Sites

According to Omniture, the average time spent at NSDL.org sites was slightly lower in 2009 than in 2008.

Average Time on Site in minutes		
	Entire Site (2009)	Entire Site (2008)
First Quarter	6.43	6.51
Second Quarter	6.52	6.67
Third Quarter	5.99	6.04
Fourth Quarter	5.91	6.11

Table 14. Time spent at NSDL.org sites

## Bounce Rate

According to Omniture, the bounce rate for search results was lower in 2009 than in 2008. However the bounce rate for search results was slightly higher in the last quarter of 2009 than in the first quarter of 2009.

The bounce rate for landing pages was mostly comparable in 2009 and 2008 but was approximately 2.5% lower during the last quarter of 2009 than the first quarter of 2009.

	2009	2008
First Quarter	85.29708	95.72295
Second Quarter	86.05588	96.15746
Third Quarter	86.05531	97.90962
Fourth Quarter	86.4653	88.34762

Table 15. Bounce Rate for Search Results

	2009	2008
First Quarter	98.48286	98.39211
Second Quarter	98.48059	98.40611
Third Quarter	97.27277	98.07797
Fourth Quarter	96.08946	98.47595

Table 16. Bounce Rate for landing pages

## Search Queries

The top search queries performed at the NSDL.org Search UI as well as from external search engines leading to nsdl.org and the landing pages are included at the end of this report.

## Possible Sources of Most Curious Search Queries

Early in 2009, a misconfiguration was discovered on the NSDL Landing page that was saving the external search term used in search engines that resulted in a hit on a Landing Page to the same category as the terms used within the NSDL Search UI. The misconfiguration resulted in unusual query terms such as website URLs. Despite fixing this error, a few strange query terms continue to appear in the list.

	Search Term	Page Views
1	gaas	622
2	plate tectonics	259
3	jakubowski	240
4	chemistry	225
5	the fungus among us	220
6	dendrology	207
7	lom	193
8	math	167
9	cells	164
10	physics	145

Table 17. Top 10 search terms for last quarter 2009

In particular, the Resource Center has wondered about *gaas* and *jakubowski*, while your friendly, neighborhood stats gatherer has been befuddled by *the fungus among us*.

These queries were cross-referenced with the referrers data to see if they were resulting for external searches leading to NSDL.org or if users were actually using the NSDL UI for these queries.

**Jakubowski:** Referring instances are from the following website by Dr. Henry Jakubowski. The NSDL logo at the top of the page is a direct link with the search term to the NSDL Search UI.

<http://employees.csbsju.edu/hjakubowski/classes/ch331/bcintro/default.html>

**gaas:** The University of Illinois at Urbana-Champaign Library contains a search proxy to NSDL Search at <http://hades.grainger.uiuc.edu/spring08/proxythru.asp> with many of the gaas searches originating from that domain.

Incidentally, gaas could be anything from Gallium Arsenide to Global Amphibian Assessment.

**The fungus among us:** This query is not originating from an external source but is being performed directly at the NSDL Search UI. Thankfully, Internet Scout Project, MSP2 and others have us covered.

In the attached data, Custom Insight 1 refers to the search terms performed at the NSDL Search UI but includes the misconfiguration from early 2009 and back. Custom Insight 5 refers only to the external search terms used on other search engines that led to an NSDL Landing page.

-----------	---	-----	--	------------------------------------

Table 18. top 10 landing pages accessed in the last quarter of 2009

## Referral Traffic

According to Omniture, referrals from search engines in 2009 dropped slightly from its height in 2008. Much of this can be attributed to the landing pages changes that came with the deaccessioning effort. Referrals that came from links on other websites and direct traffic continued to rise.

	2007	2008	2009
<b>Search Engines</b>	325,656	1,142,793	944,008
<b>Other Websites</b>	144,679	218,523	245,041
<b>Typed/Bookmarked</b>	93,861	149,508	169,115
<b>Hard Drive</b>	6	7	1
<b>Email</b>	3	2	
<b>Totals</b>	211,251	716,333	516,801

Table 18. Referral traffic to NSDL.org sites

Referring traffic from K-12 sites has increased through the years. K-12 sites were determined by limiting the referring domains report to domains containing *k12*, *school*, or *sd*. but excluding *hsd*.. This method is not guaranteed because some K-12 sites may contain none of these conditions while other non-K-12 sites may. While examining some referring domains, it was common that most sites with 'sd.' as part of the URL were school districts. Sites that contained 'hsd.' typically involved high speed data, and were excluded. Specific data is included at the end of this report.

## 2. nsdl.org, NSDL pathways, and selected partner websites

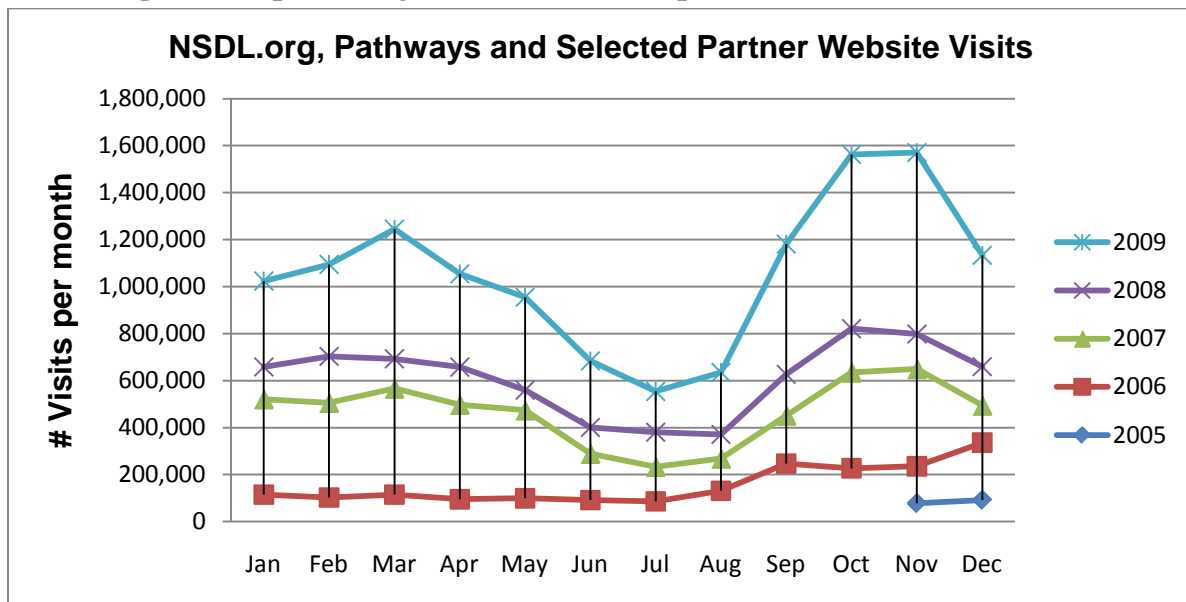

Figure 2. Visits to NSDL.org, Pathways and Selected Partner websites

Visits for rollup accounts instrumented with Omniture are shown below. The rollup account includes ComPADRE, Teachers' Domain, CSERD, CI, SERC, DLESE, SDSC, Math Gateway and ENC. Other accounts not included in the rollup account were Middle School Portal and NEEDS.

	2009	2008	2007
<b>ComPADRE</b>	5,365,878	718,260	334,960
<b>CSERD</b>	2,976,699	2,748,769	2,829,856
<b>Teachers' Domain</b>	2,297,268	2,042,645	1,362,279
<b>CI</b>	1,058,121	1,193,327	434,539

<b>NEEDS</b>	96,468	83,374	41,272

Table 20. Visits to other accounts not included in the rollup

### 3. Notes

The basic unit of analysis reported here is the 'visit.' A visit begins when a person first views a page on nsdl.org or a partner site, and ends after measured activity ceases for 30 minutes. The assumption is that each visit represents an attempt by a user to complete a task on nsdl.org. For information on the differences between 'visits' and other webmetrics, such as 'page views,' see 'Introduction to NSDL Webmetrics,' [https://wiki.nsdl.org/images/4/4d/06\\_webmetrics\\_intro.pdf](https://wiki.nsdl.org/images/4/4d/06_webmetrics_intro.pdf)

The webmetrics discussed in this report are provided by Omniture. Note that not all NSDL Pathways sites are instrumented with Omniture. Omniture can report lower website traffic than individual projects' server webmetric tools.

NSDL is retiring the Omniture contract in March 2010. All future statistics will be from Google Analytics, which was implemented during fall 2009.
