LibQUAL+™

LibQUAL+™ is a survey that measures user perceptions and expectations of library service quality in four dimensions: Access to Information, Affect of Service, Library as Place, and Personal Control. In spring 2003, the survey was completed by almost 130,000 users from 308 institutions in the U.S., Canada, the U.K., and the Netherlands. Participating institutions included college and university libraries, community college libraries, health sciences libraries, military libraries, public libraries, and state libraries. Users were asked for their judgments on three scales for each survey question: the *desired* level of service they would like to receive, the *minimum* they are willing to accept, and the actual level of service they *perceive* to have been provided. The desired and minimum scores establish the upper and lower boundaries of a *zone of tolerance* within which the perceived scores should float if respondents view service as adequate (see Key to Bar Charts). This framework allows the use of gap analysis to interpret results. If scores are within the zone of tolerance, the service *adequacy gap* is positive because users' perceptions are higher than their minimum expectations, although lower than their desired expectations. Positive service adequacy gaps are shown in blue on the radar charts below (see Key to Radar Charts). Conversely, a negative service adequacy gap occurs when perceptions fall below minimum expectations; this is represented on the radar charts in red. A positive *superiority gap* occurs when perceptions exceed desires; this is represented on the radar charts in green.

| LibQUAL+™ 2003 by the Numbers		
	Institutions	**Surveys**
Total	308	128,958
American English	285	115,852
Colleges and Universities	221	98,206
Community Colleges	30	7,354
Academic Health Sciences	22	7,388
Military Institutions	6	1,697
Public and State Institutions	5	741
Academic Law Institutions	1	466

Survey Activity by Day
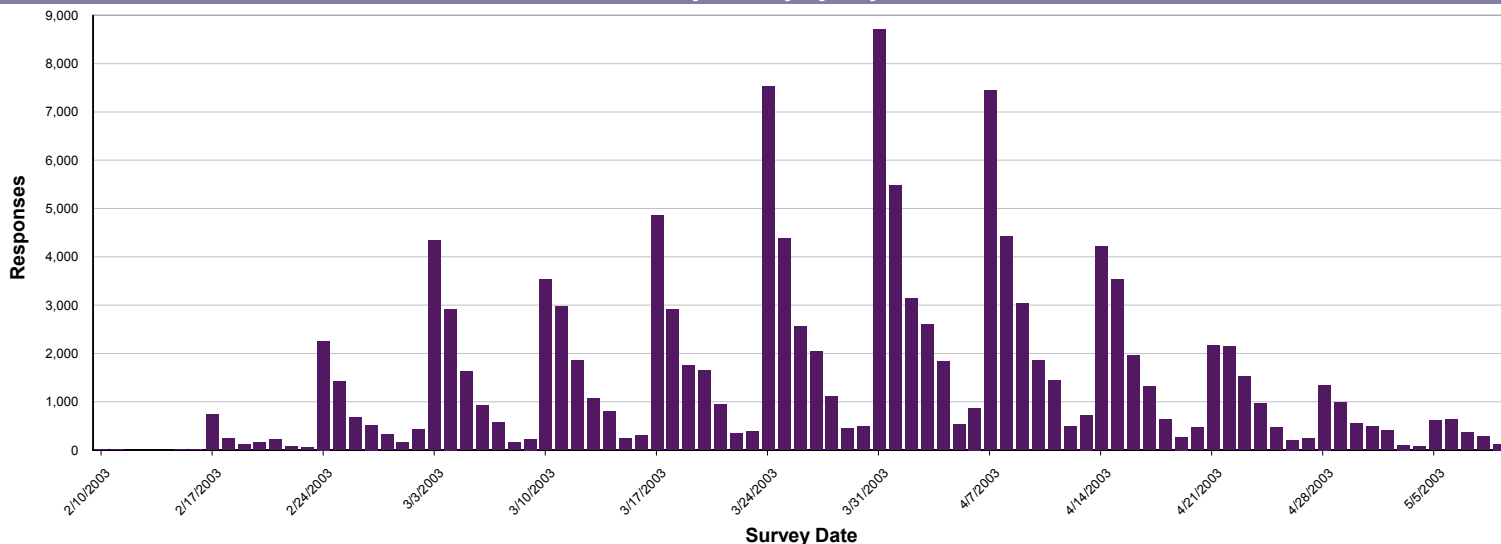

Publications

Spring 2003 LibQUAL+™ data on 11 groups of libraries are available from ARL Publications:

American Association of Health Sciences Libraries (AAHSL) Survey Results
   Summary statistics for the 21 AAHSL member library participants.

Association of Research Libraries (ARL) Survey Results
   Summary statistics for the 66 ARL member library participants.

MERLN (Military Education and Research Library Network) Survey Results
   Summary statistics for the 6 MERLN member library participants.

Network of Alabama Academic Libraries (NAAL) Survey Results
   Summary statistics for the 9 NAAL member library participants.

NY3Rs College and University Libraries Survey Results
   Summary statistics for the 71 NY3Rs College and University library participants.

NY3Rs Public Libraries Survey Results
   Summary statistics for the 5 NY3Rs Public library participants.

Oberlin Libraries Group (OLG) Survey Results
   Summary statistics for the 12 Oberlin Libraries Group member library participants.

OhioLINK Libraries Survey Results
   Summary statistics for the 45 OhioLINK member library participants.

SCONUL Libraries Survey Results
   Summary statistics for the 20 SCONUL member library participants.

American English Libraries Survey Results
   Summary statistics for the 286 American English library participants.

Canadian French Libraries Survey Results
   Summary statistics for the 2 Canadian French library participants.
